1967 - 1970	Shepherd Construction Ltd., Yorkshire.
1960 - 1967	Planner, John Twiname Ltd., Cumbria.

Brief Summary

Roger Gibson has over fifty years experience in construction; a significant part of which was working for several contracting companies.

By the mid-1970's, Mr Gibson had worked for various contractors in the UK in planning & programming roles reaching the level of Planning Manager. In 1976 he moved overseas, initially joining the Dutch contracting and engineering company, Ballast Nedam, and working in Saudi Arabia for 6 years; followed by a further 6 year period in Greece with a large construction and engineering company, Consolidated Contracting Company ('CCC') taking up the role of Head of Project Control. Mr Gibson returned to UK in 1988 to work for Lehrer McGovern Bovis and was primarily involved with the planning & programming of the first phase and early construction works at Canary Wharf in London's Docklands.

In 1991, Mr Gibson joined Gardiner & Theobald Fairway who provide dispute resolution services. Mr Gibson received many appointments as an Expert Witness and was appointed a director in 1996. In 1999 he joined the Hill International organisation in their newly-opened London office, again becoming a Director and continued to receive Expert Witness and adjudication appointments.

In March 2001, he formed Gibson Consulting Limited to provide planning, programming and dispute resolution services to parties involved in construction and engineering disputes; with the emphasis on extension of time entitlements, delay & disruption, and associated loss and expense costs. Roger has received many Expert Witness and adjudication appointments.

Mr Gibson has considerable experience of claims avoidance and dispute resolution services involving construction and engineering projects. He has provided both written Expert evidence and oral testimony in Court and before Arbitration tribunals.

His speciality is evaluating delay and extension of time claims, involving concurrent delays, mitigation and disruption, through detailed analysis of programmes and other documents, together with the evaluation of associated time-related costs. He has a proven ability to communicate complex issues through simple easily understood graphics, illustrations and exhibits; and the linkage to time related costs.

Dispute Resolution Experience

Roger Gibson has been appointed as an expert on time related issues in numerous disputes up to more than £100M in value, carrying out forensic planning and delay analysis studies, for Contracting and Employer organisations. Recent appointments include projects such as hospitals, bioscience and other laboratory facilities, large residences, commercial developments and power stations.

He has testified many times as an Expert Witness before Arbitration tribunals and in the Technology & Construction Court, including being the only Planning Expert who gave oral testimony and was cross-examined in the 'landmark' case of *Royal Brompton Hospital NHS Trust v Frederick A Hammond & Ors [2000] EWHC Technology 39*.

Mr Gibson is a practising Adjudicator, and continues to receive appointments by adjudicator nominating bodies such as The Technology and Construction Solicitors Association and Construction Industry Council.
